

IEAST | AMP-i50B v2

Wall-Mount Wireless Multi-Room Stereo Amplifier

IEAST® AMP-i50Bv2

Wall-Mount Wireless Multi-Room Stereo Amplifier

Multiroom streaming audio system
Every area is available, one-key operation to listen to good music.
Enjoy tons of music.

What is AMP-i50Bv2?

AMP-i50Bv2 is a multi-room background sound host with built-in 50Wx2, which can directly drive 4Ω/8Ω speakers and transmit music via WiFi and Bluetooth.

Once set up, simply use your iPhone®, iPad®, Android, phones and tablets, Mac® and Windows® laptops to stream your favorite music to every room in your home;

At the same time, it also has analog and coaxial digital inputs, which can simultaneously stream other audio sources (such as dvd, TV) to other speakers.

Multi-room listening with better sound

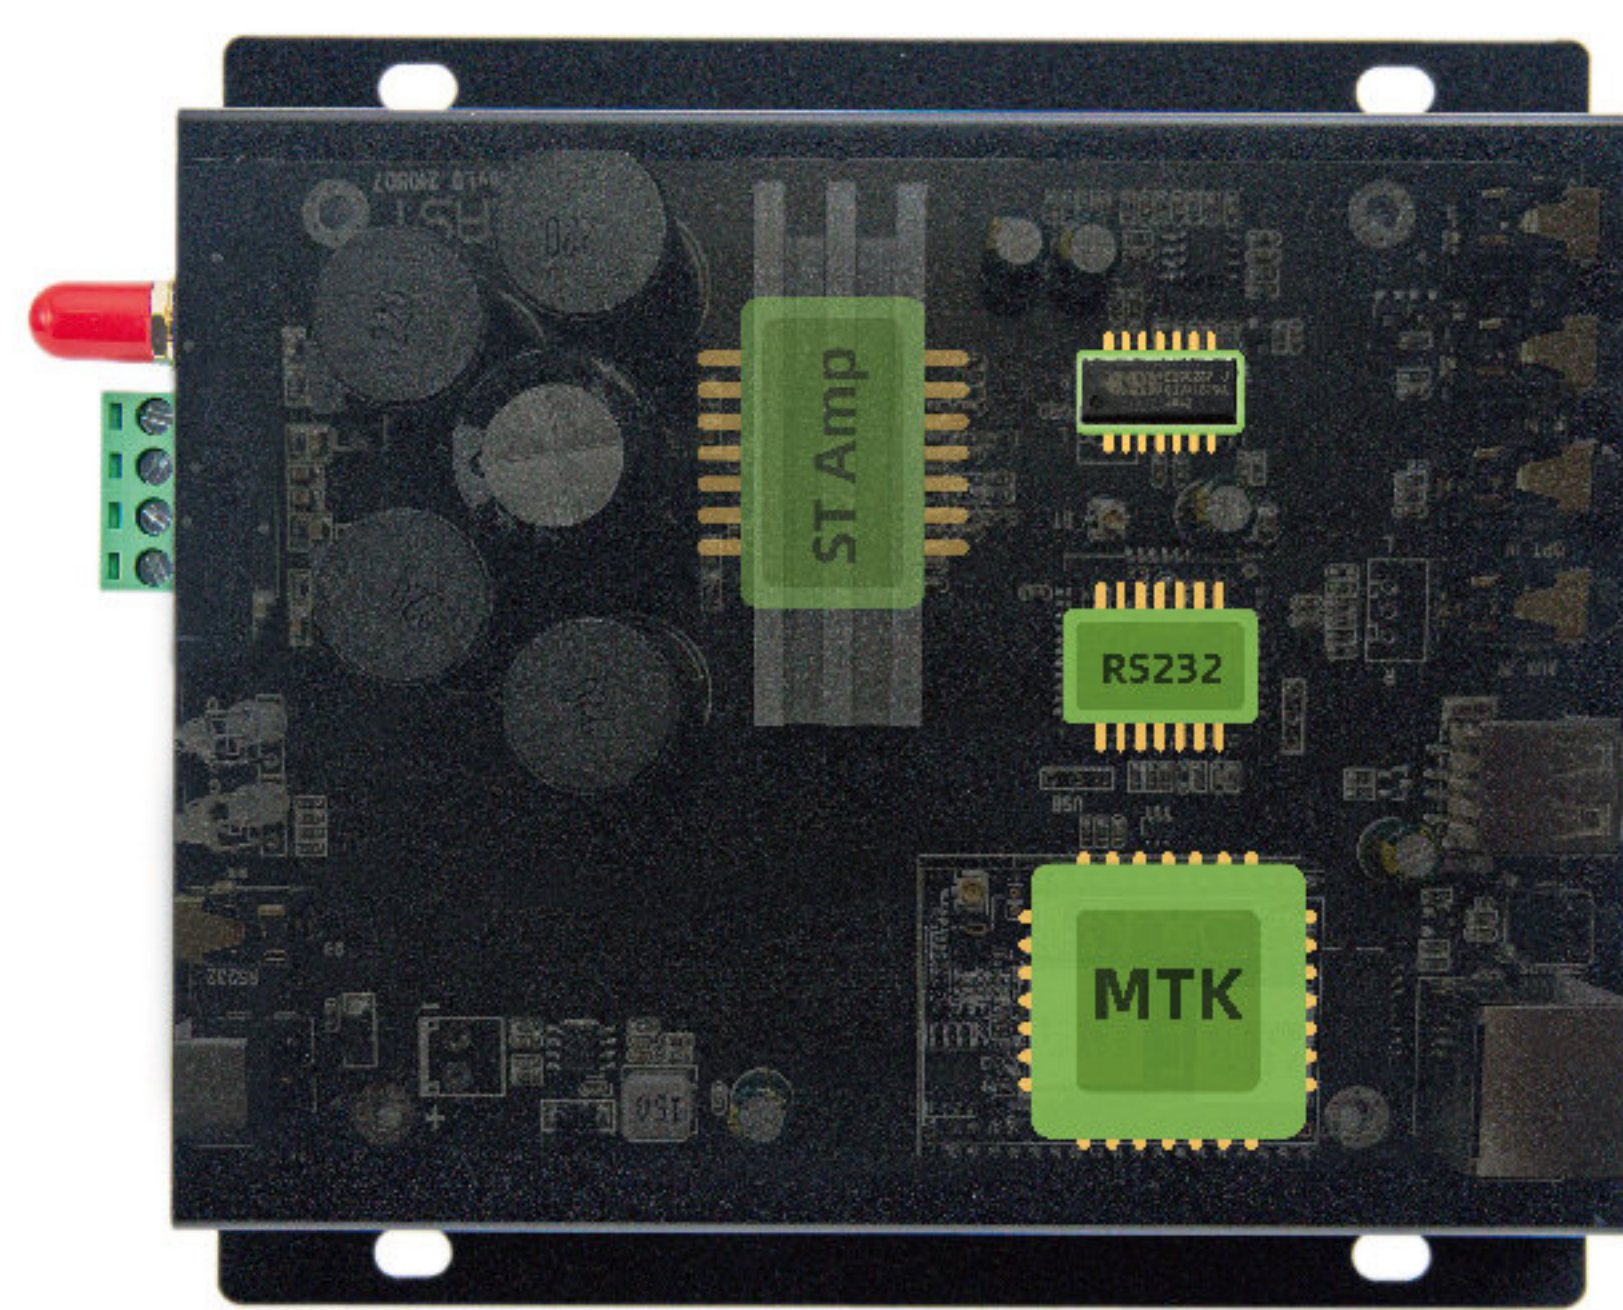

Add more IEAST streaming devices in your home, connect your best speakers, place it in different rooms, and you'll be able to:

- Stand-alone mode: Stream different music in different rooms without interfering with each other;
- Partition mode: Partition or all speakers play songs synchronously, and enjoy them together.

ESS9023+TDA7492

Classic ESS9023 DAC audio decoding chip from ESS and TDA7498E high performance analog CLASS D audio amplifier chip from ST are adopted. The combination of the two has the characteristics of strong parsing ability, pure tone color and high power and low distortion output.

WiFi/ Ethernet/Bluetooth three connections

- Supports 802.11b/g/n /Wi-Fi and 10/100M Ethernet, providing a more stable and fast network connection rate. After networking, you can easily listen to online high-quality music, network radio and your local music collection.
- Bluetooth connection supported.

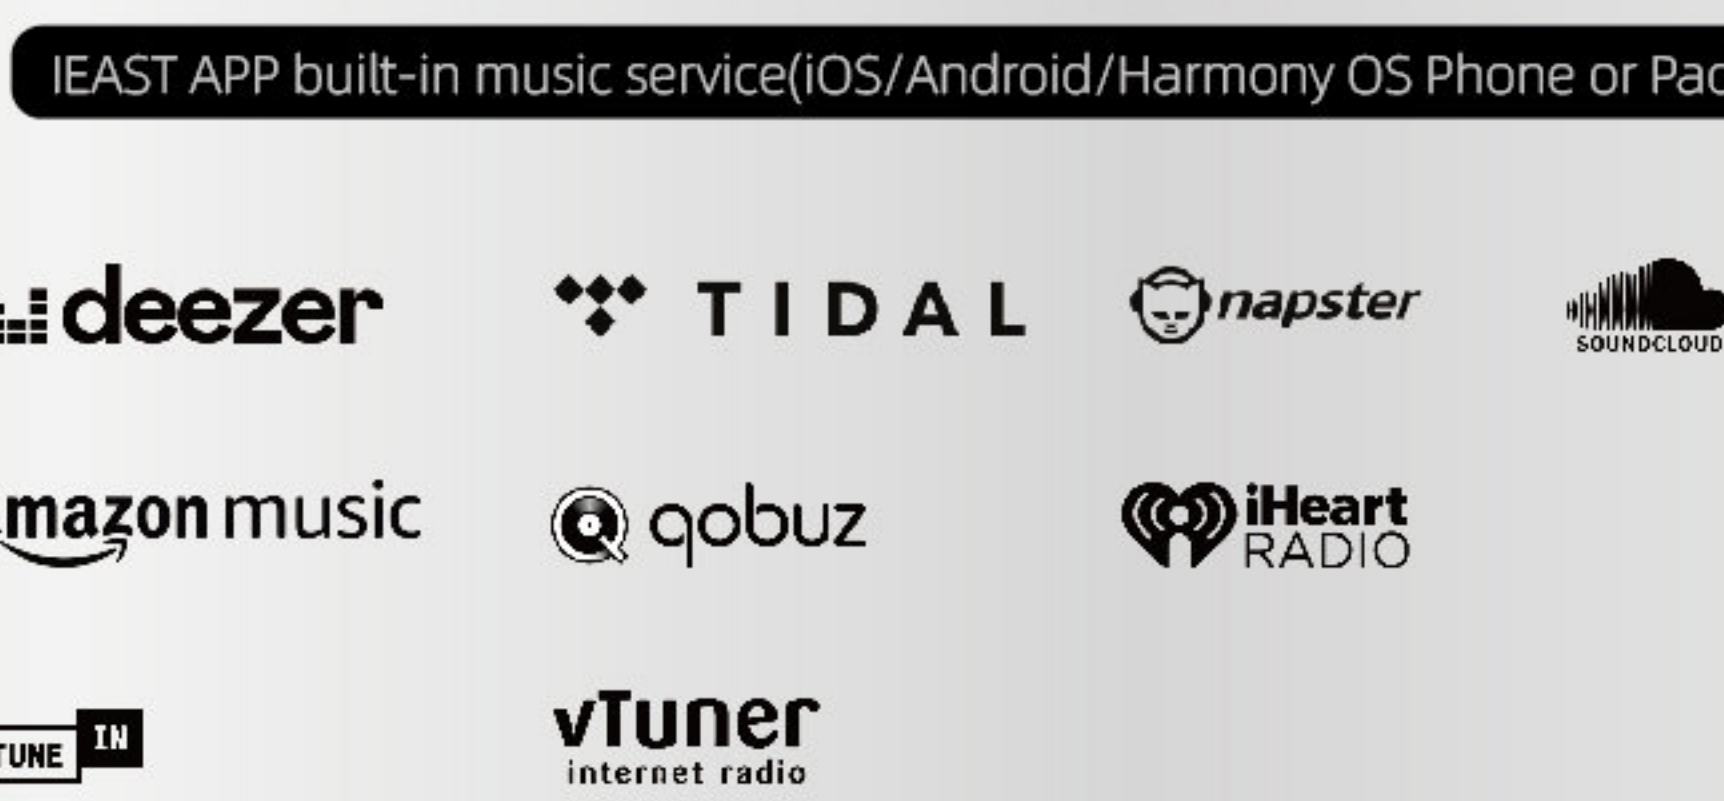

Enjoy tons of music

Supports many music services

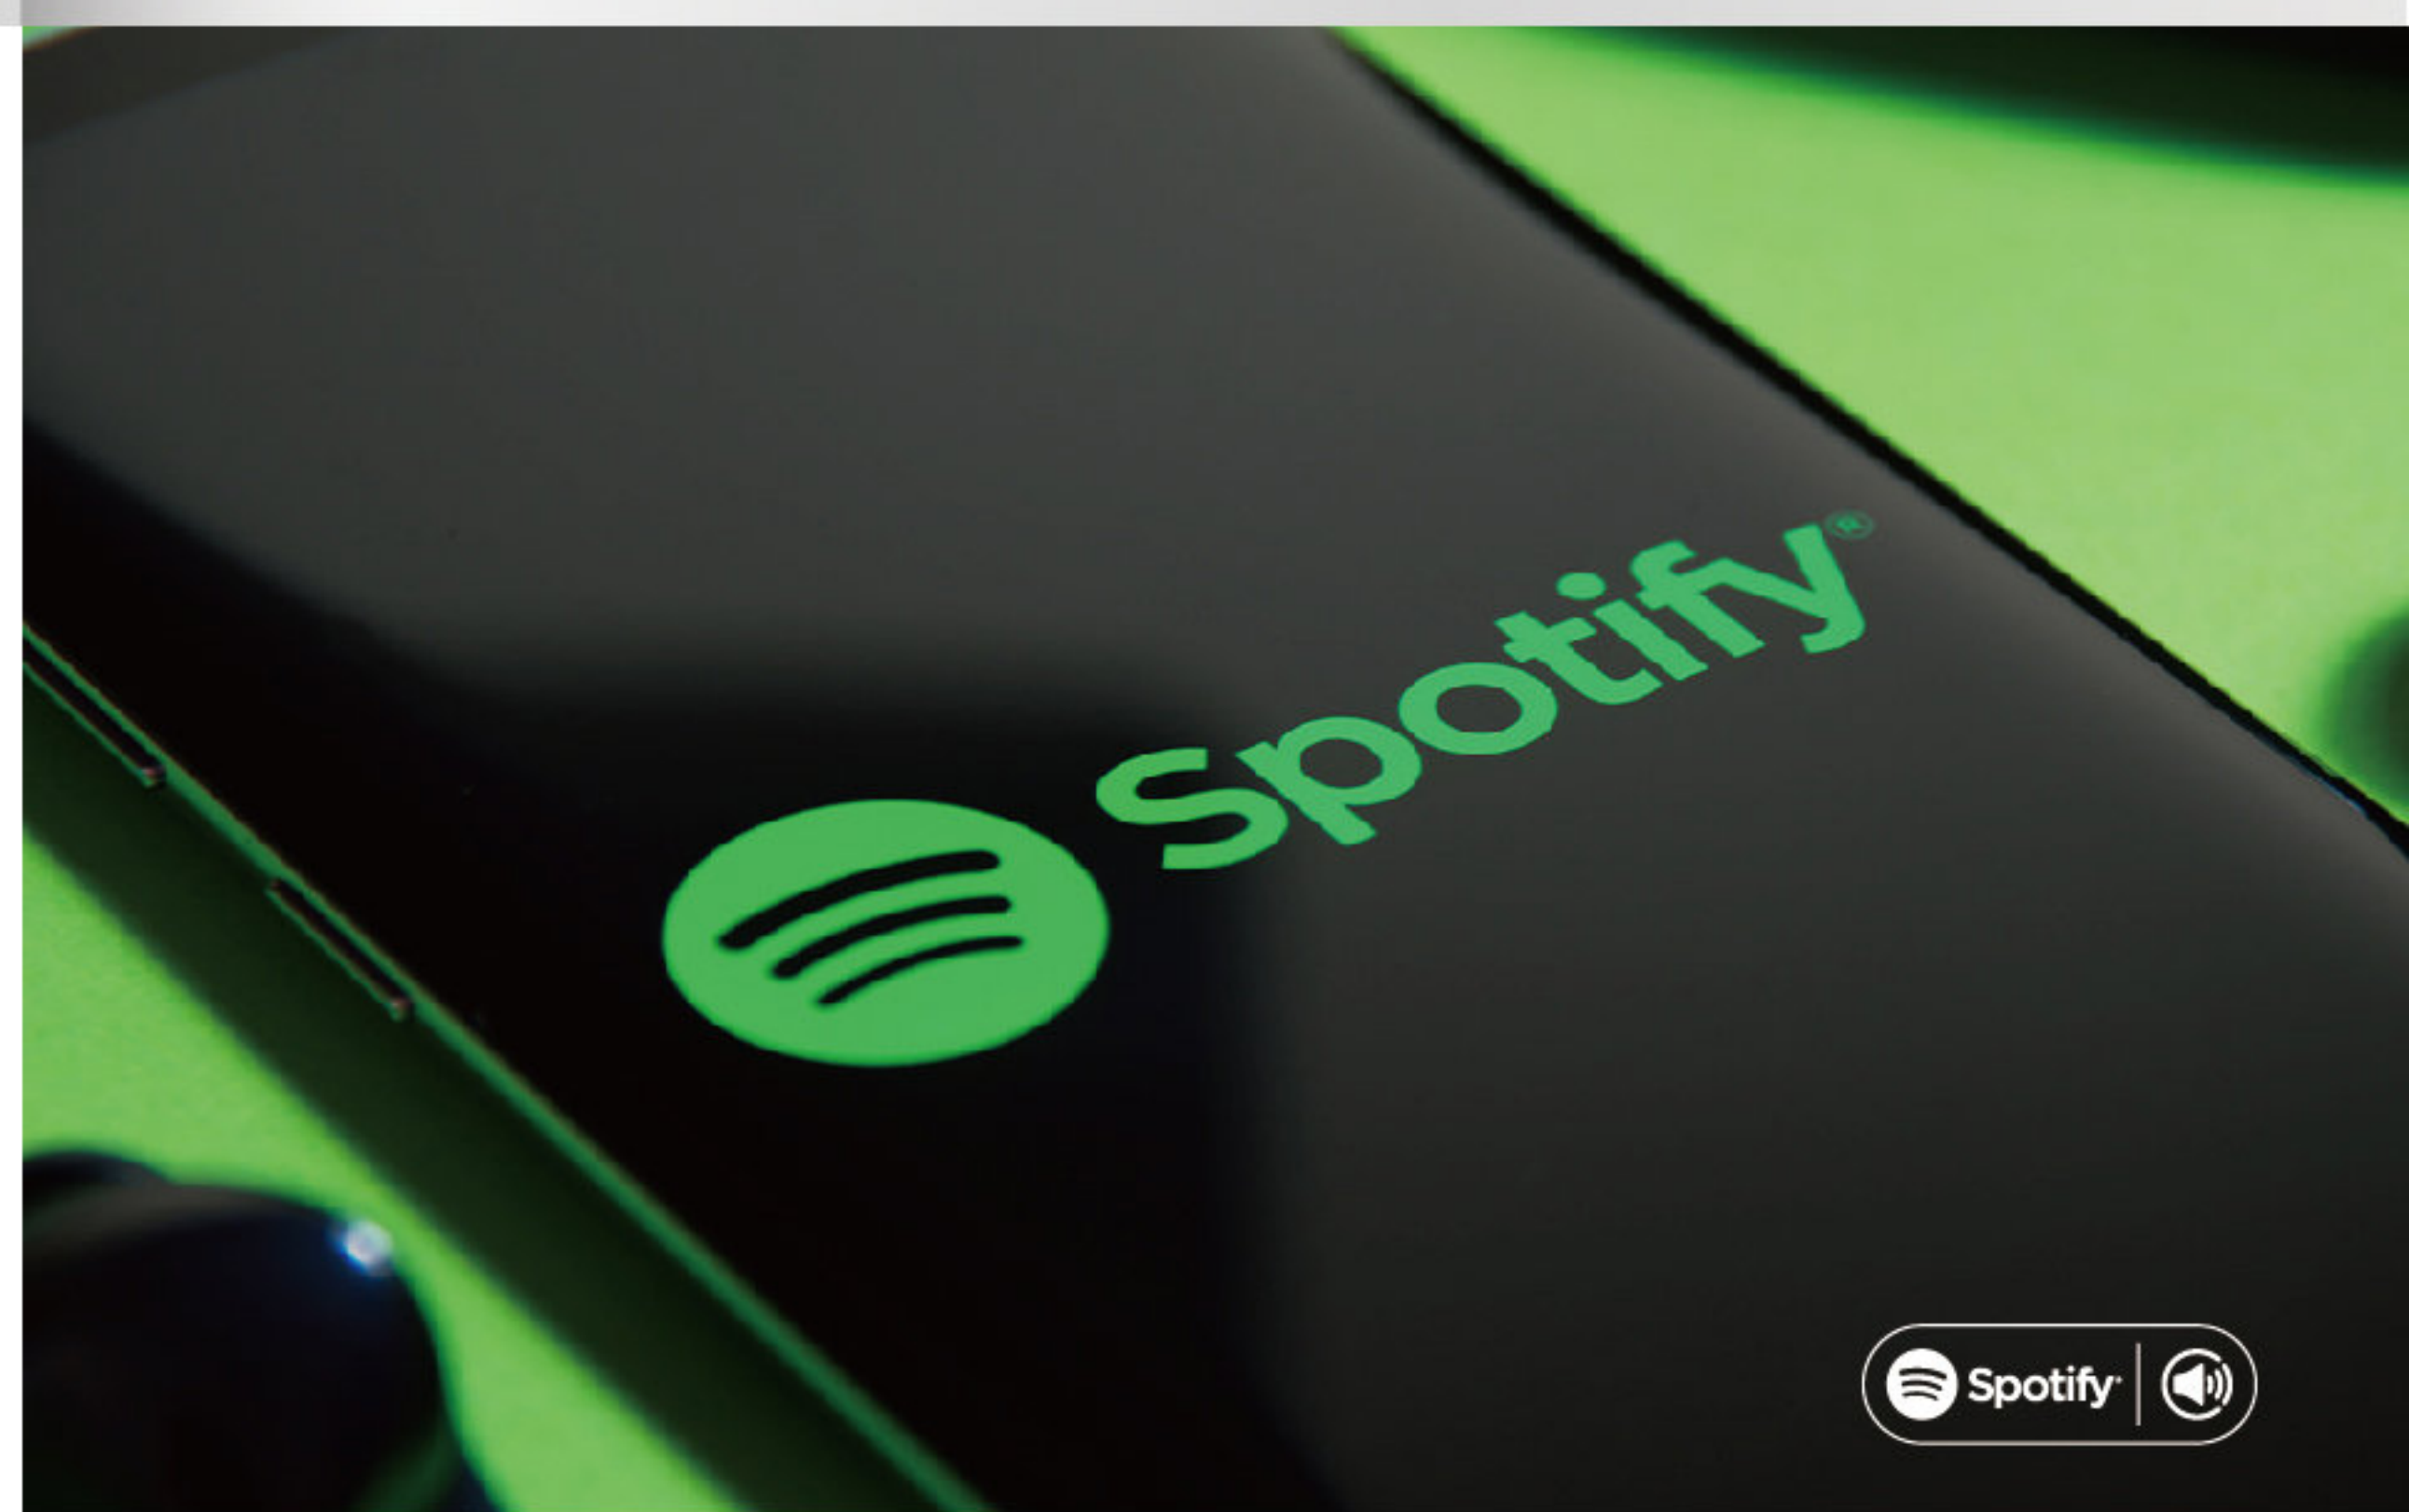

Tip: the above APP is supported via Airplay / Bluetooth

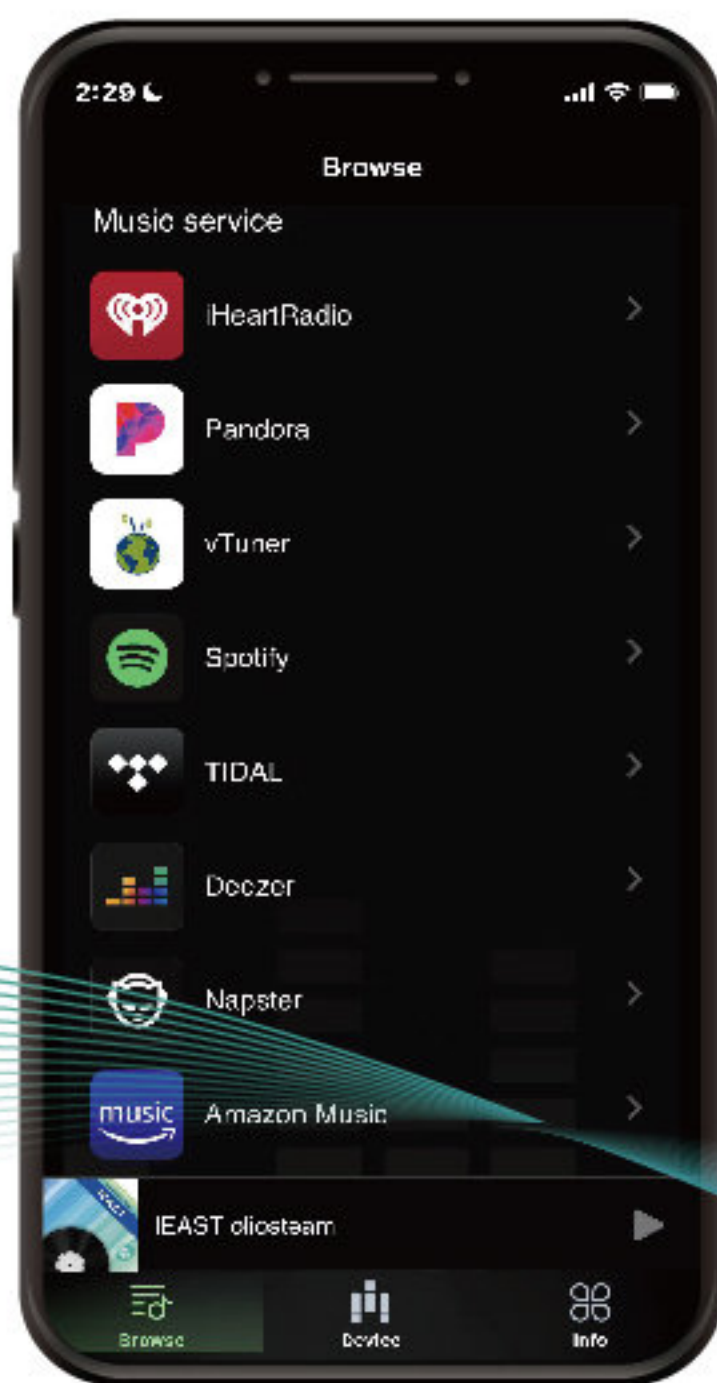

Support Spotify Connect

With Spotify Connect, you can use one device to remotely control listening on another. You're no longer restricted to listening to the catalogue solely through your phone or desktop. Spotify Connect is a godsend for house parties – so long as you trust your friends with the controls! – but it's really for anyone who wants to easily access Spotify's 60-million-song-catalogue and curated playlists on hi-fi and AV kit and smart speakers without the hassle of Bluetooth pairing.

IEAST controller apps

With the IEAST controller application, you can quickly set up your IEAST wireless audio products, easily achieve multi-room music synchronization, product free combination, playback control, EQ adjustment and many more features.
